

# **MONTHLY REPORT #31**

DECEMBER 2024

NOTRUSTVERIFY.CH

---

Here is a summary of work done by No Trust Verify since our last report

## 15 DECEMBER

Launch of our latest dApp, "**Token Furnace**," on Alephium! It allows you to easily burn tokens you no longer want and support healthier tokenomics across the ecosystem! 🔧

- ✓ Declutter your wallet
- ✓ Reduce supply, boost value
- ✓ Transparent, on-chain burns

Don't hesitate to try this one: <https://furnace.notrustverify.ch/>

## 17 DECEMBER

🔒 In our latest article, discover how to buy the \$ALPH token without KYC and protect your privacy using solutions from the Alephium ecosystem.

You can check it out here :

<https://blog.notrustverify.ch/how-to-buy-alph-token-without-kyc>

## ALEPHIUM METRICS

On the following page, you'll find some charts relating to Alephium. To begin with, here is an evolution of the price of \$ALPH with a comparison to \$BTC, over the month of December.

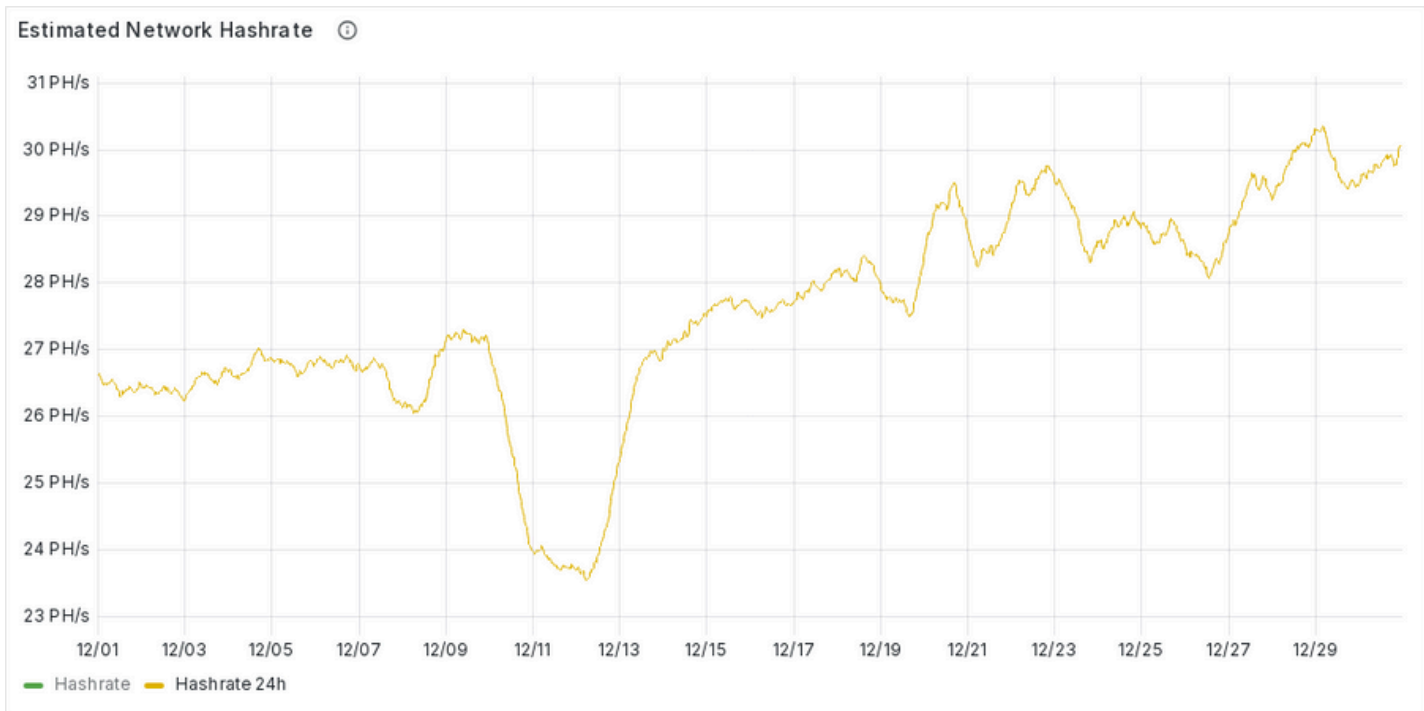

Another comparison between \$ALPH vs TOTAL3 (all altcoins excluding \$BTC and \$ETH)

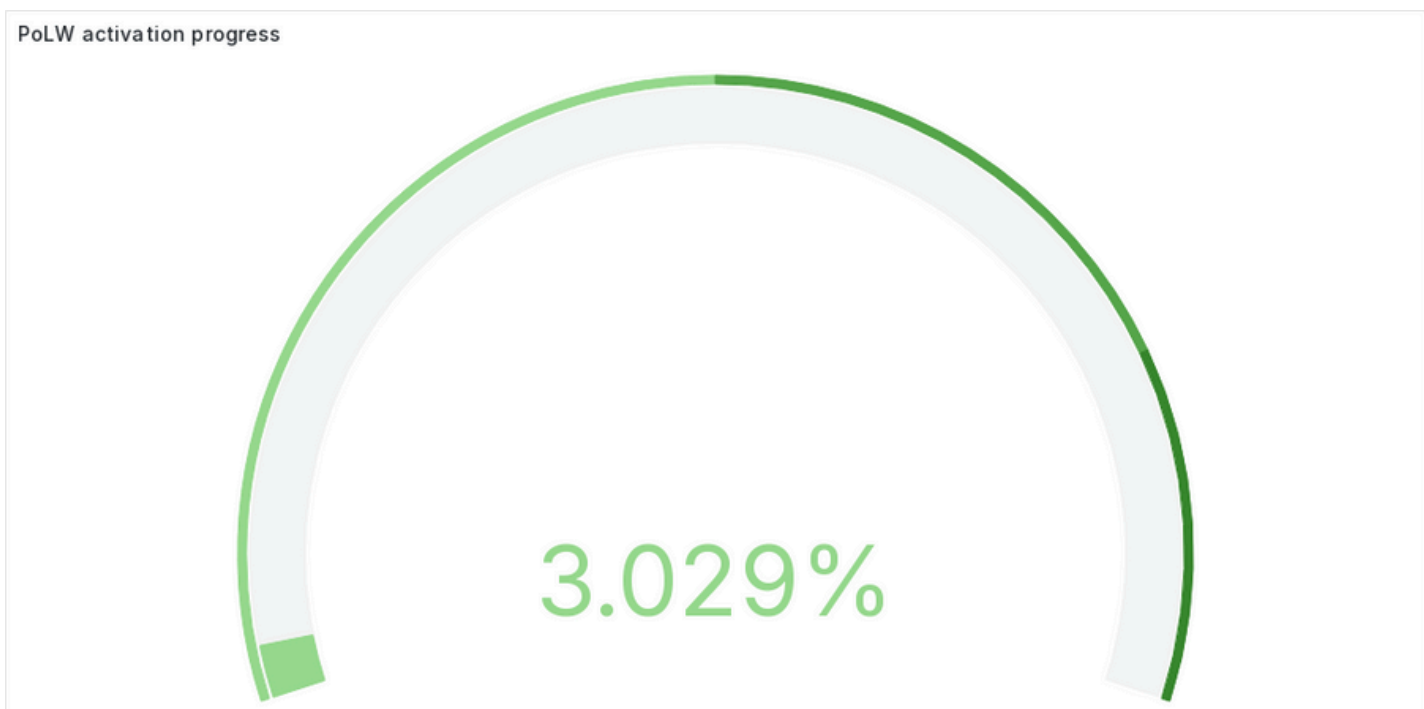

## ALEPHIUM METRICS

This section illustrates the evolution of the hashrate. We are still in a phase of continuous growth, with a **13.8% increase**

In terms of PoLW activation progression, approximately **315 ALPH** were burned in December.

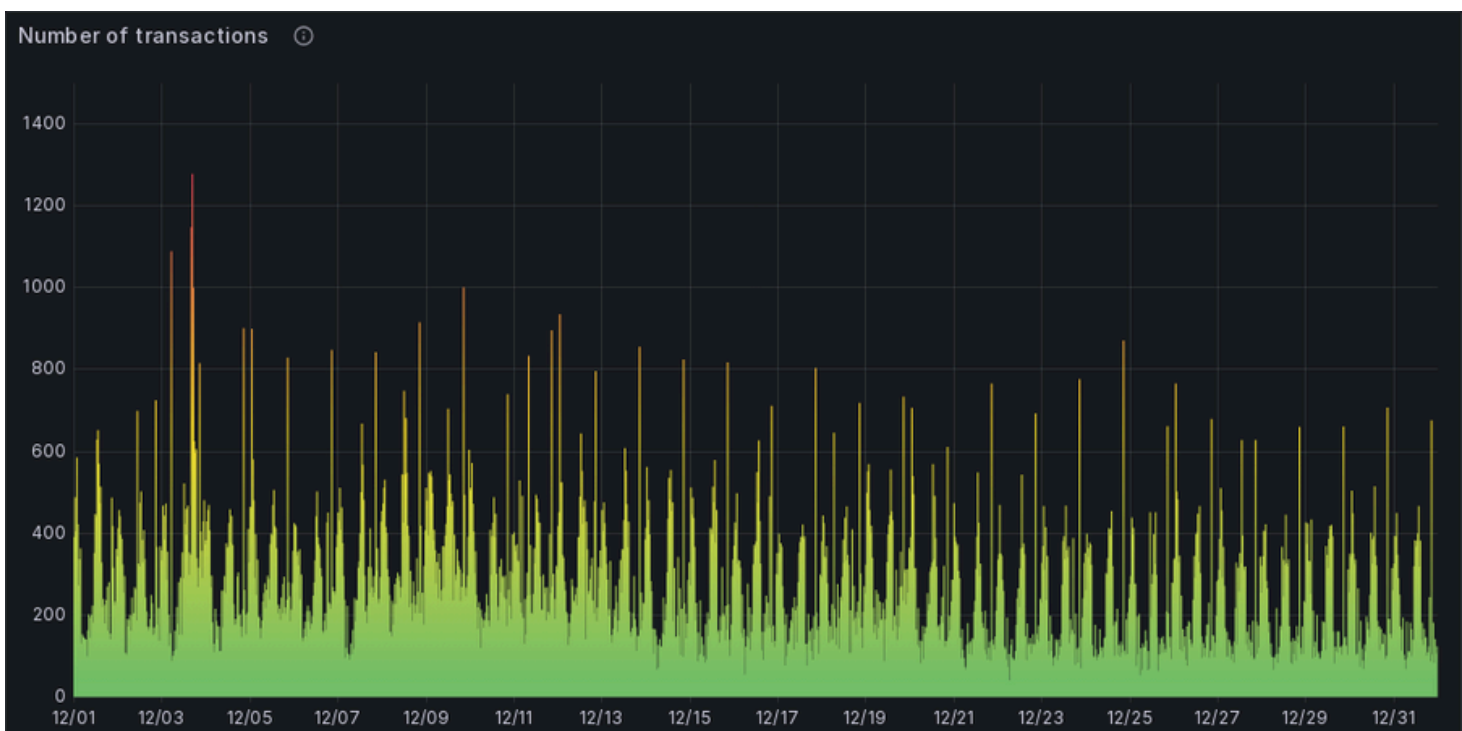

## ALEPHIUM METRICS

Here's the evolution of the total number of active addresses.

Source : <https://richlist.alephium.world/>

Over the month, the network processed approximately **409k transactions**.

The No Trust Verify team would like to thank you for your trust and remains at your disposal It's the end of another fulfilling year, and the No Trust Verify team would like to thank its partners, delegators, and all those who support us for their trust. We look forward to kicking off 2025, which already promises to be exceptional.
