

MONTHLY REPORT #3

FROM JULY 15 TO 20 AUGUST, 2022

[NYM.NOTRUSTVERIFY.CH](https://nym.notrustverify.ch)

Here is a summary of the different work done by No Trust Verify.

22 JULY

Publication of our second activity report

30 JULY

We have implemented the use of Telegram through the NymConnect, including the No Trust Verify gateway

02 AUGUST

The team grows with the arrival of kovOx

09 AUGUST

We have implemented the use of Keybase through the NymConnect, including the No Trust Verify gateway

10 AUGUST

Deployment of the first Tor version of our website.

12 AUGUST

Participation in the Nym french community call

Upcoming work and events on No Trust Verify

-Implementation of the reward calculator on the website

-Updates on the website

Important information. Please note the following points.

Currently, the bug in the smart contract for rewards is still present.

Remember, if you do one of the following actions claim or compound, it can happen that afterwards your new rewards are not displayed anymore. To fix this, you need to do an undelegate / delegate after one of these actions, so that the new rewards are displayed again.

It is better to use only undelegate and then delegate to give your accumulated rewards.

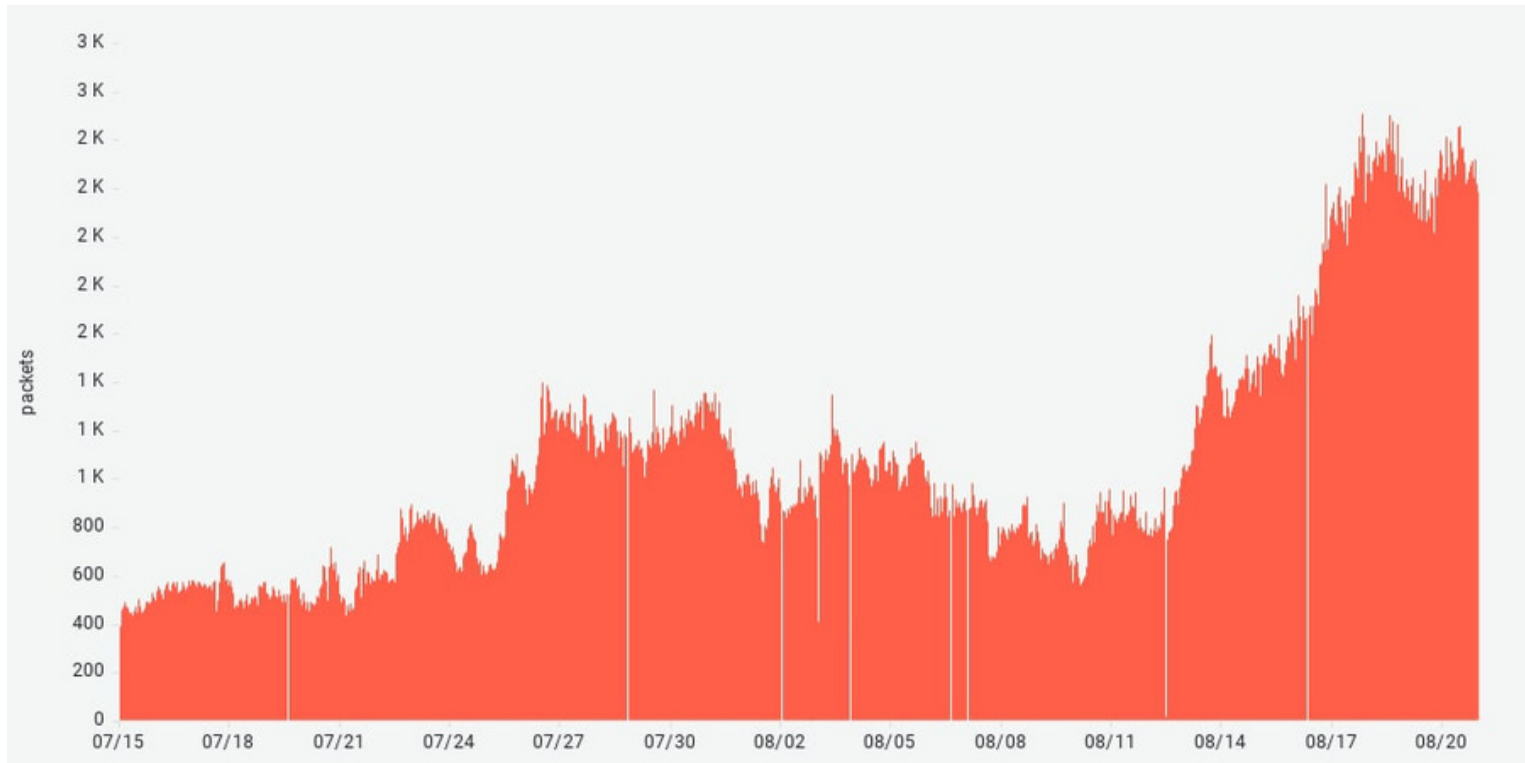

The latest version of the Nym wallet 1.0.8 is released. If you haven't already done so, don't forget to update your version.

METRICS

Below are our various metrics for the period July 15 to August 20, 2022. For this period, we received approximately **89.517 million packets** to process on our two mixnodes.

Nearly 44.702 millions packages on the NTV1 mixnode

And nearly 44.815 millions packets on the NTV2 mixnode

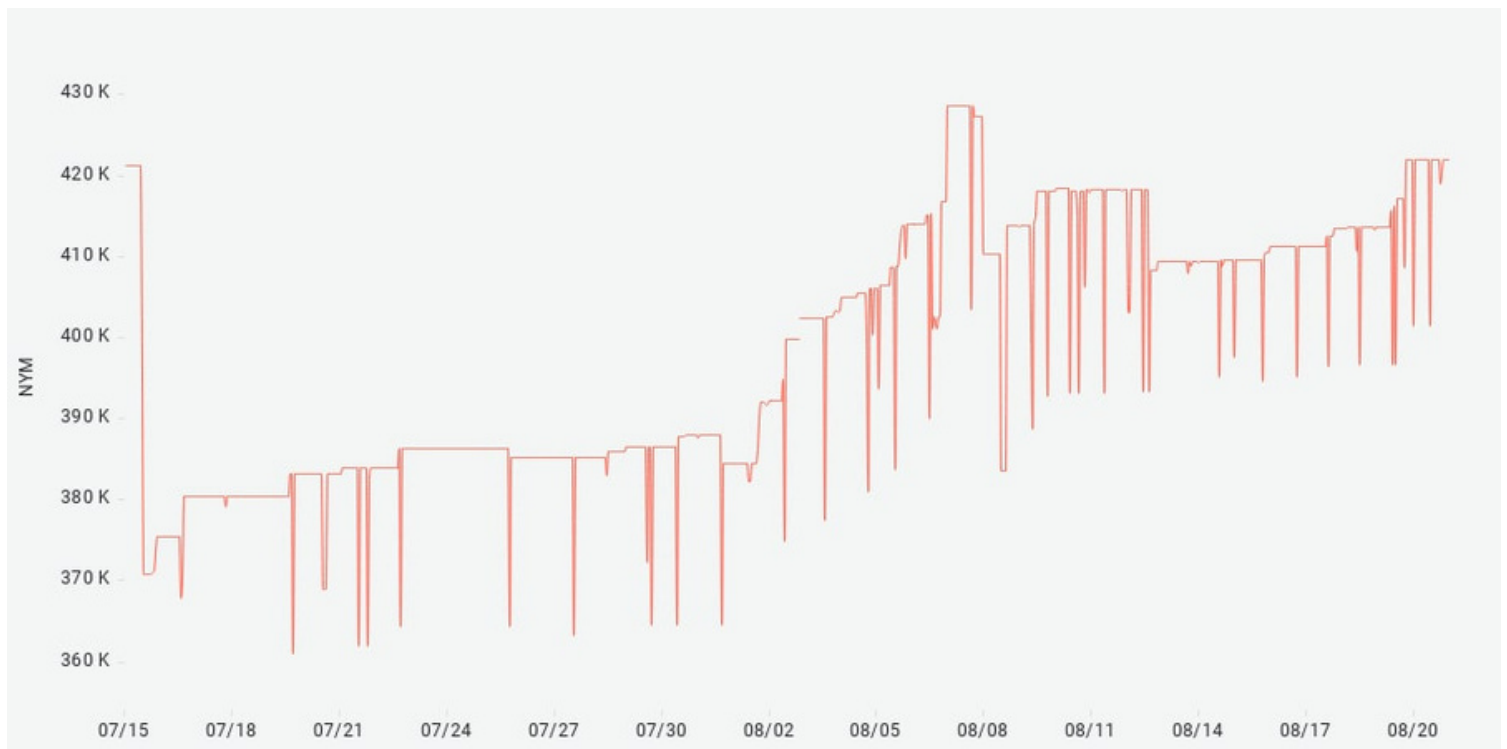

METRICS

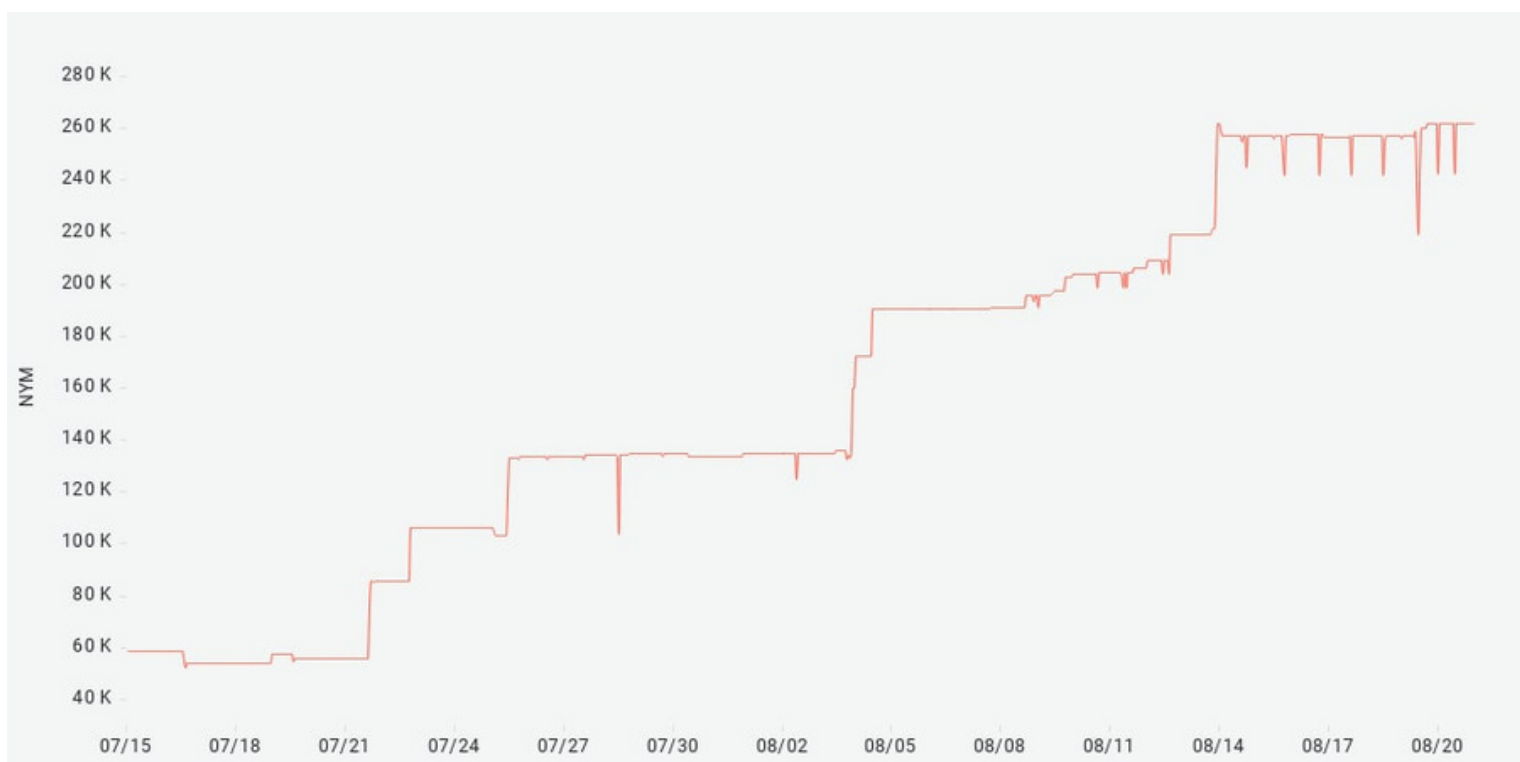

You will find below our different measures for the period from July 15 to August 20, 2022 concerning the delegations made on our mixnodes. On NTV1, the daily variations are due to people who undelegate & delegate to claim their rewards.

Disclaimer: There is currently a bug in the smart contract on the explorer of Nym affecting all operators of mixnodes. The figures presented below, after the correction of this one could change.

NTV1

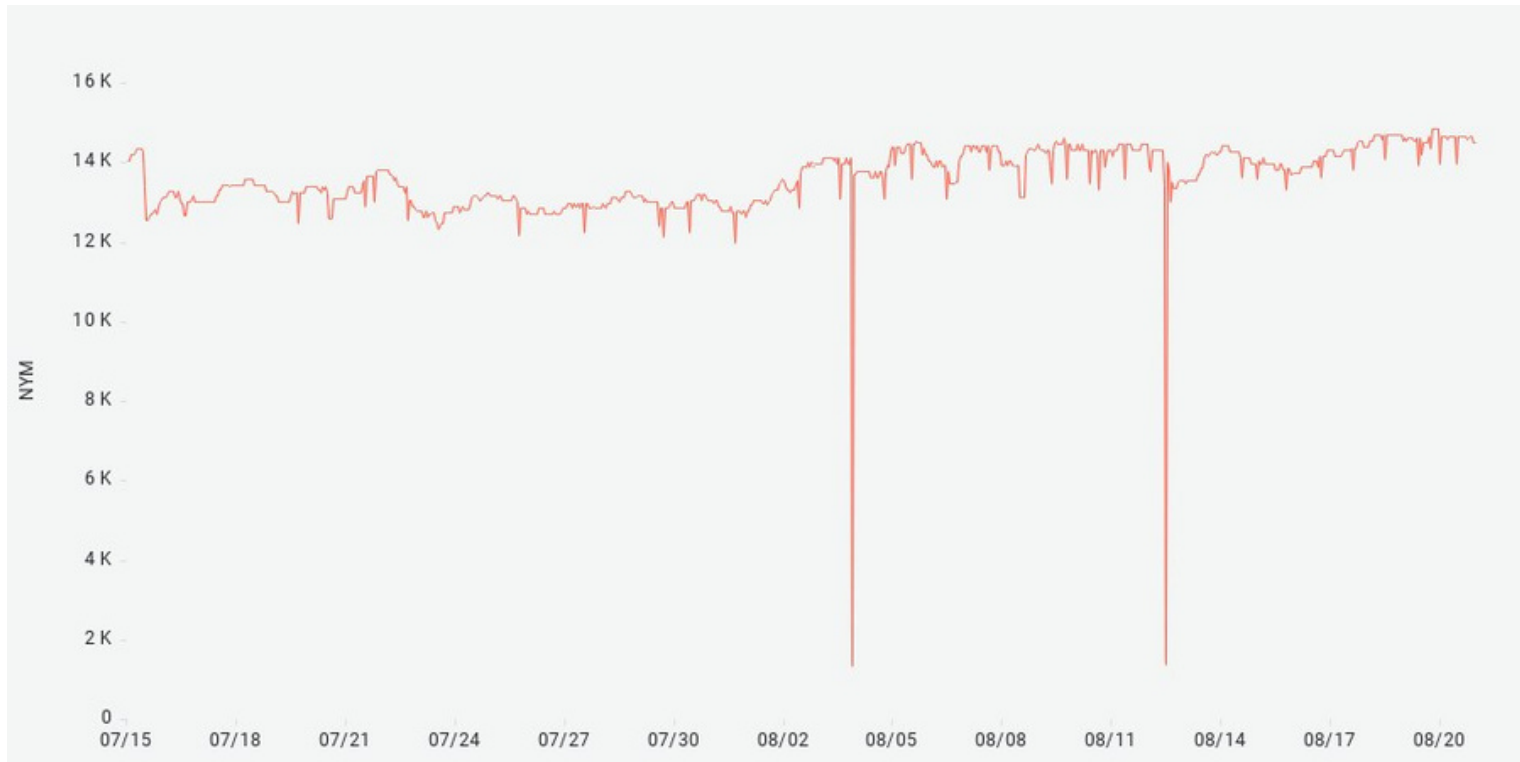

NTV2

METRICS

Below are the statistics for Estimated delegator rewards days for NTV1 & NTV2. At this point, our average APY is between 43-44%. The drop on August 11 comes from the fact that we have abond & bond the mixnodes.
