MONTHLY REPORT #14

JULY 2023

NOTRUSTVERIFY.CH

Here is a summary of the work done by No Trust Verify since our last report

01 JULY

Following the Paradigme Bitcoin event, the No Trust Verify team also took part in the Privacy Reunion and The Jura P2P festival events, for which we were sponsors.

05 JULY

As part of our collaboration with PineappleProxy, we have contributed to the first native integration of Nym's mixnet in an application: nostrnym.pnproxy.org, which is a fork of the Iris application.
This allows you to have an account only living on the mixnet.

Disclaimer: it can take times to load some profile, it's still in an application in development.
We would be happy to have your feedback, our DM are open

10 JULY

As part of our activities around the Alephium project and possible synergies with Nym, we have created a tutorial on how to buy ALPH tokens confidentially on TradeOgre via the Nym mixnet using the NymConnect application.

Link to the tutorial.

13 JULY

As a follow-up to our article "Buying ALPH tokens via Nym's mixnet", No Trust Verify has also made a tutorial on how to use Alephium's wallet on your computer via the NymConnect application.

Link to the tutorial.

18 JULY

We are thrilled to announce that we are now running our very own #Whoogle instance!

search.notrustverify.ch

Explore the web with privacy and freedom while avoiding tracking. No more ads following you around ! Experience the benefits of a user-centric search engine.

Find out more : https://blog.notrustverify.ch/instance-whoogle

28 JULY

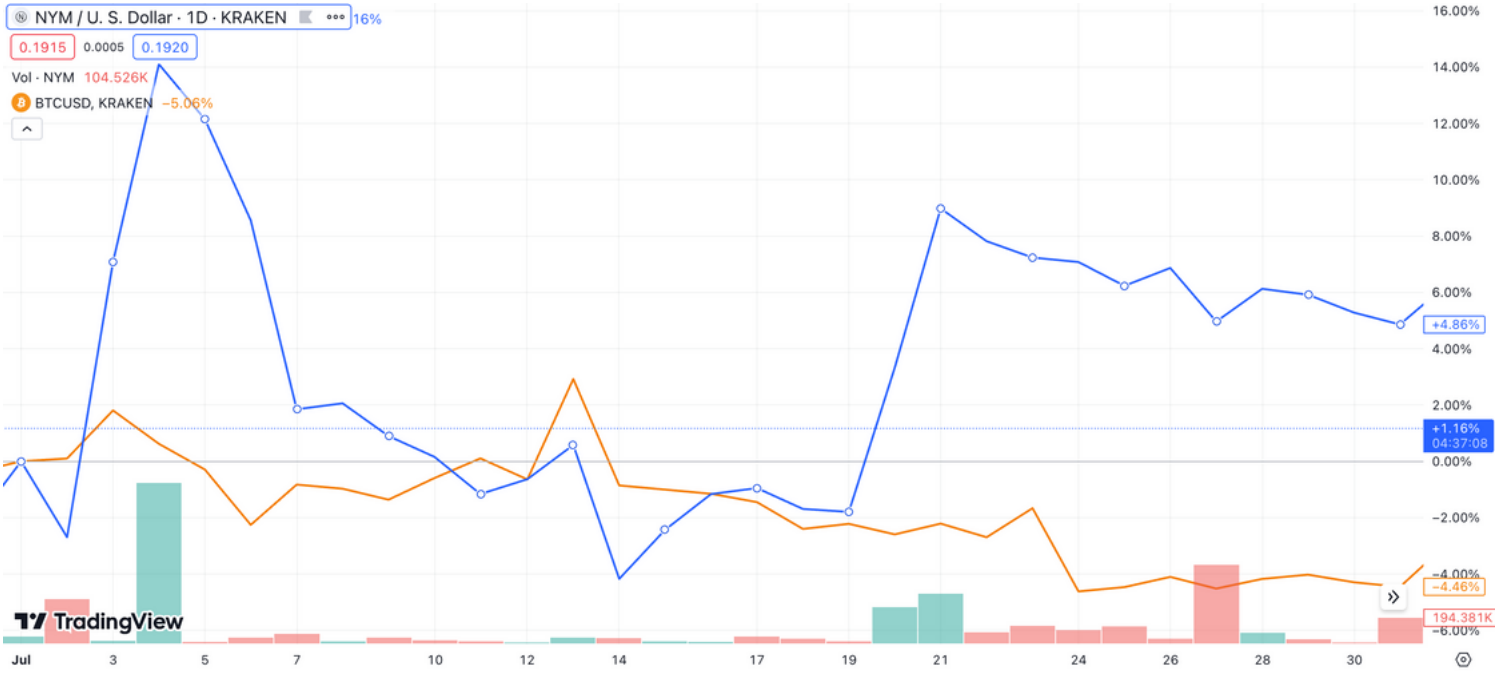
We are pleased to inform you that No Trust Verify has been selected by Nym for the first Community Grants. Read on to learn all about the first winners of this year's Nym community grants programme, which will help Nym scale the private internet.

With Shipyard Academy V2 setting sail in September to make Nymsters into Nymjas, NTV will prepare dev onboarding materials, list new use cases for Pastenym and Nostr, and expand additional guides for the journey. NTV will write how-tos for building censorship-resistant tools using NymConnect, and how to integrate NymConnect with the most popular Defi protocols.

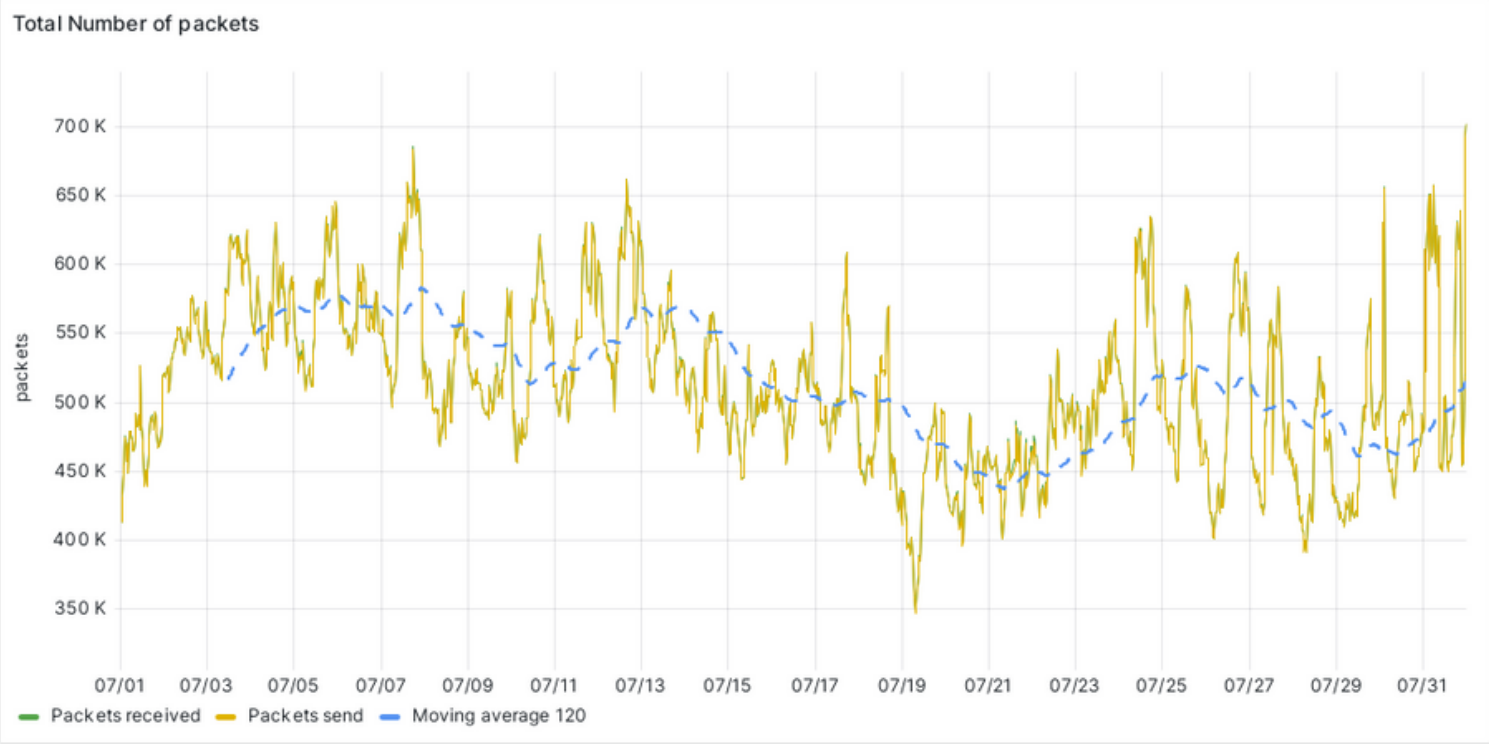
NYM METRICS

From now on, you will find in our monthly report some important metrics of the NYM network.

To begin with, here is an evolution of the price of $NYM with a comparison to BTC , over the month of July.

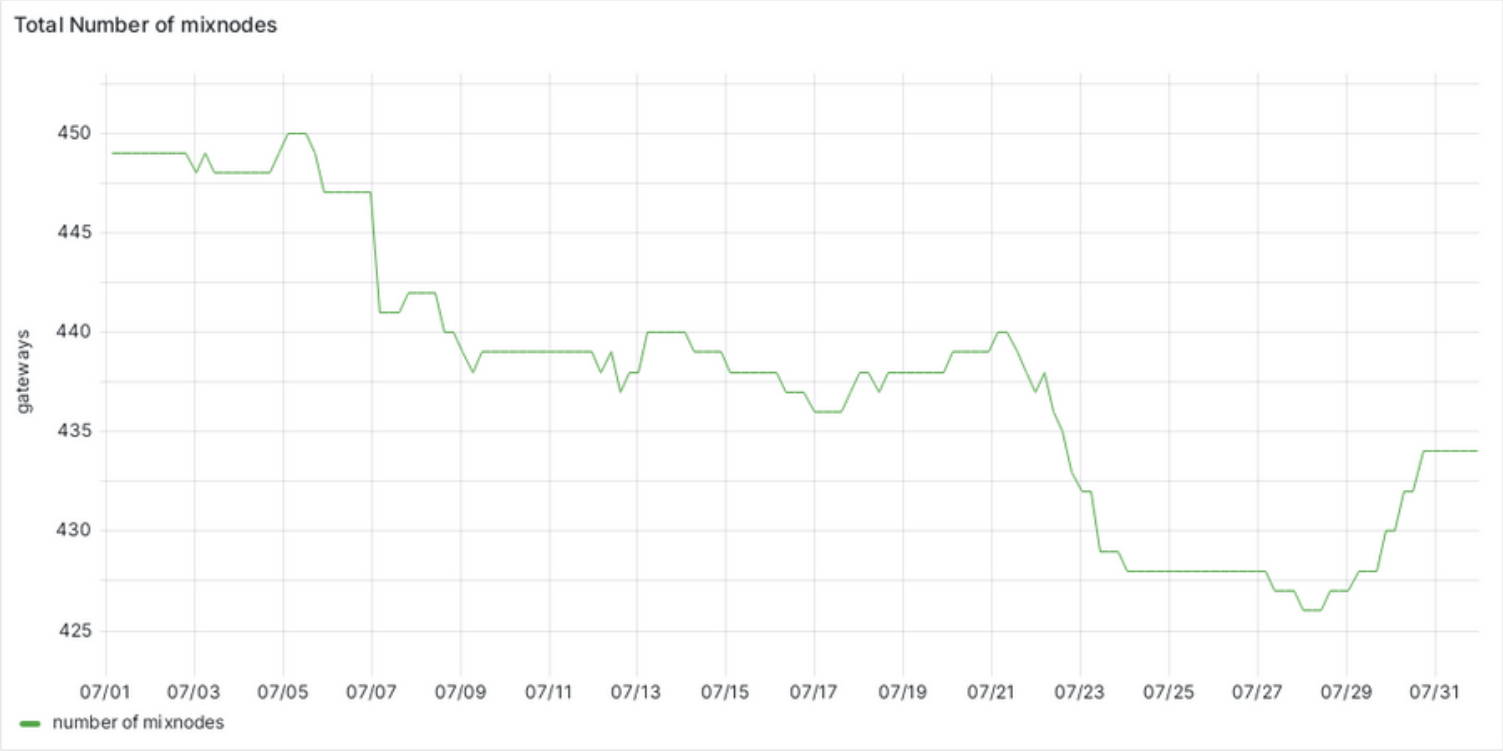


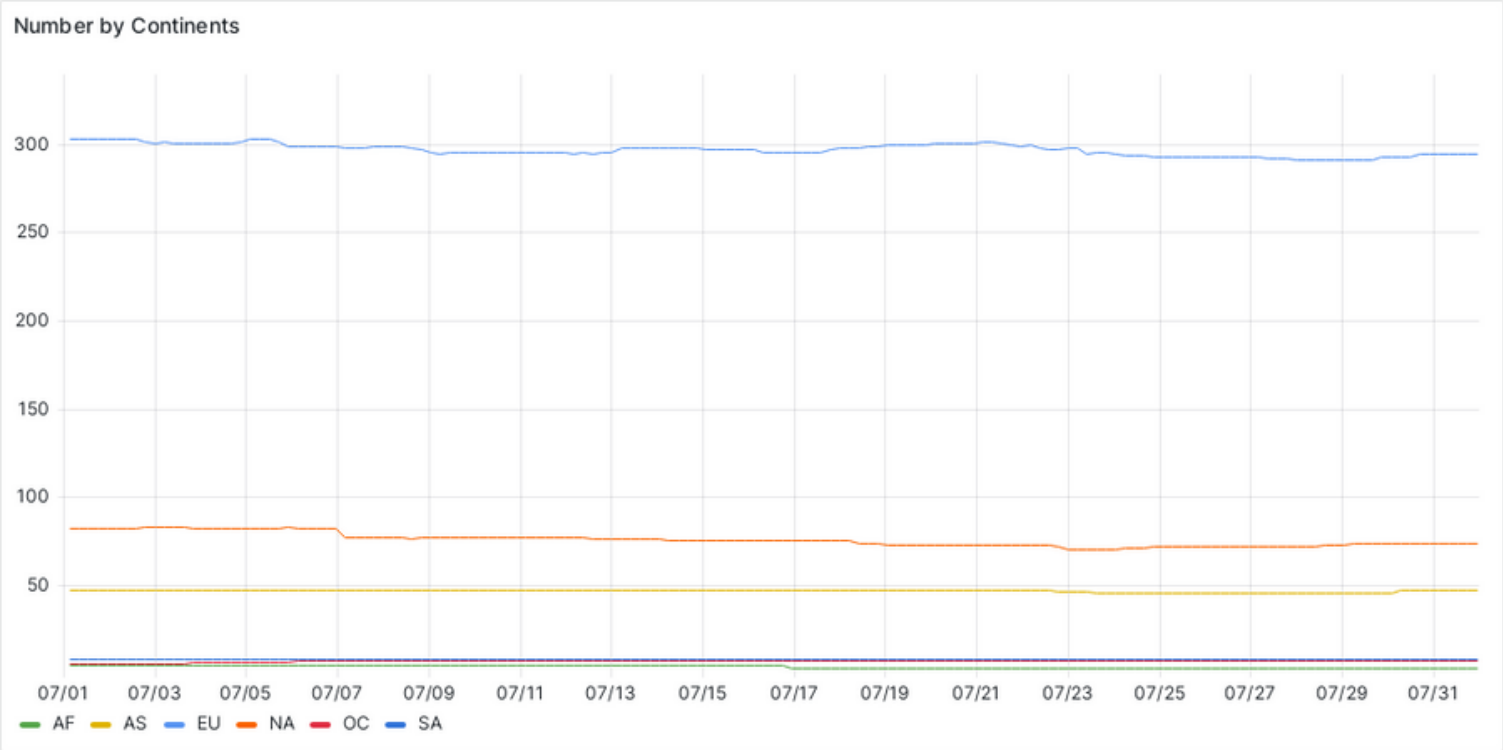
Evolution of packet processing for the entire mixnet.



NYM METRICS

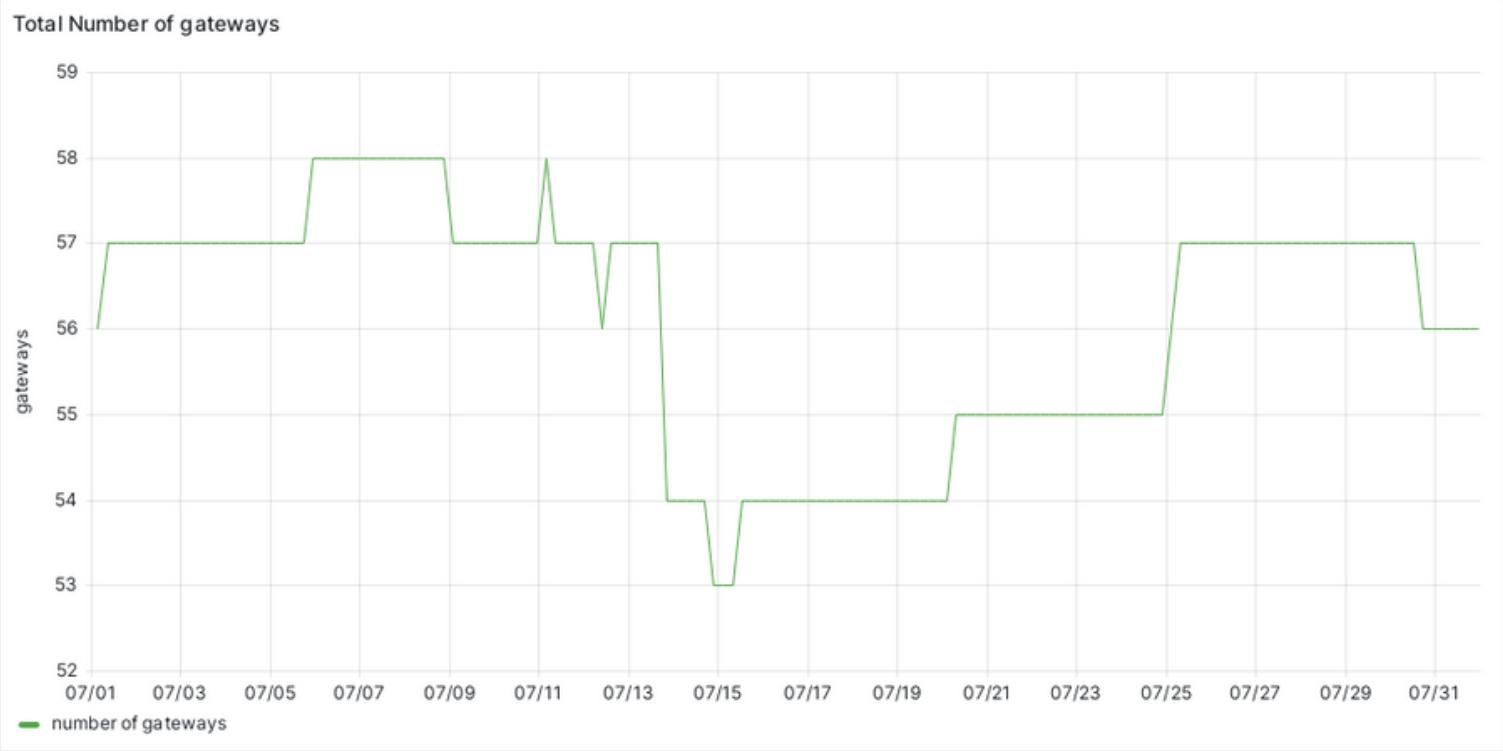
We will now look at the evolution of the **mixnodes** metrics in terms of their number and geographical distributions.

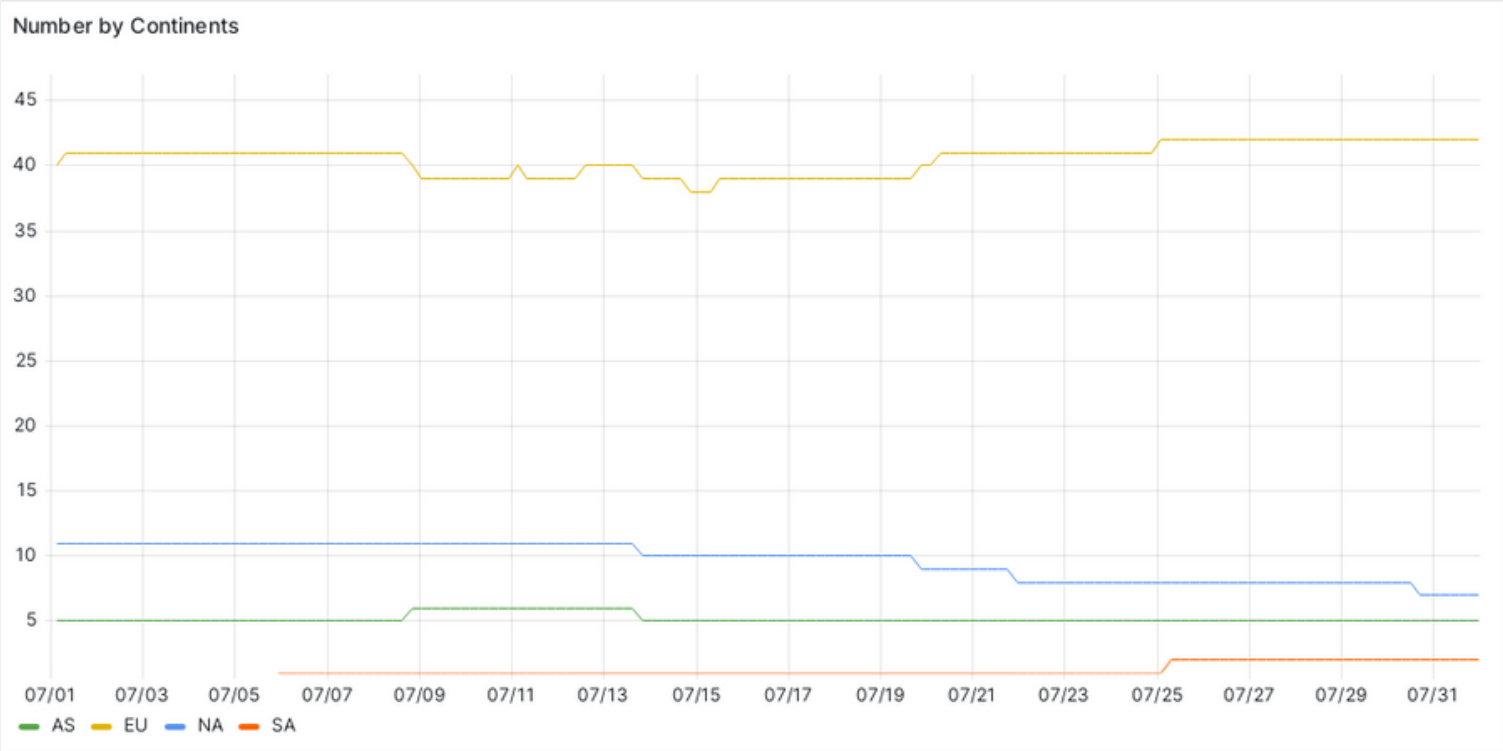




NYM METRICS

This section will describe the evolution of the **gateways** metrics in terms of their number and geographical distributions.





For more details about the metrics related to the Nym Mixnet, do not hesitate to consult our grafana:

https://status.notrustverify.ch/grafana/d/CW3L7dVVk/nym-mixnet?orgId=1

NTV METRICS

Let's go to the metrics related to No Trust Verify, you will find on this page the evolution of the packets processed by our mixnodes during the month of July.
