## IMPORTANT INFORMATION!!

### **NYM STAKE SATURATION CHANGE**

If you are delegating NYM tokens to NTV nodes, this message is very important for you.

Recently, Nym enforced the reduction of the maximum saturation value per node from about 1M NYM to 250K NYM, effective immediately. This change was applied without prior communication, apart from a vague message with no enforcement date. As a result, many of our nodes are currently at or near the old limit (~1M), due to your strong support as delegators.

#### **What this means for you**

If you are delegating to our nodes, you will need to redelegate your stake in order to stay within the new 250K NYM cap. We know this is not ideal — it's a disruptive change, and we are just as frustrated by the lack of prior notice. But unfortunately, Nym's enforcement leaves us no choice but to inform you and comply.

#### **What we are doing**

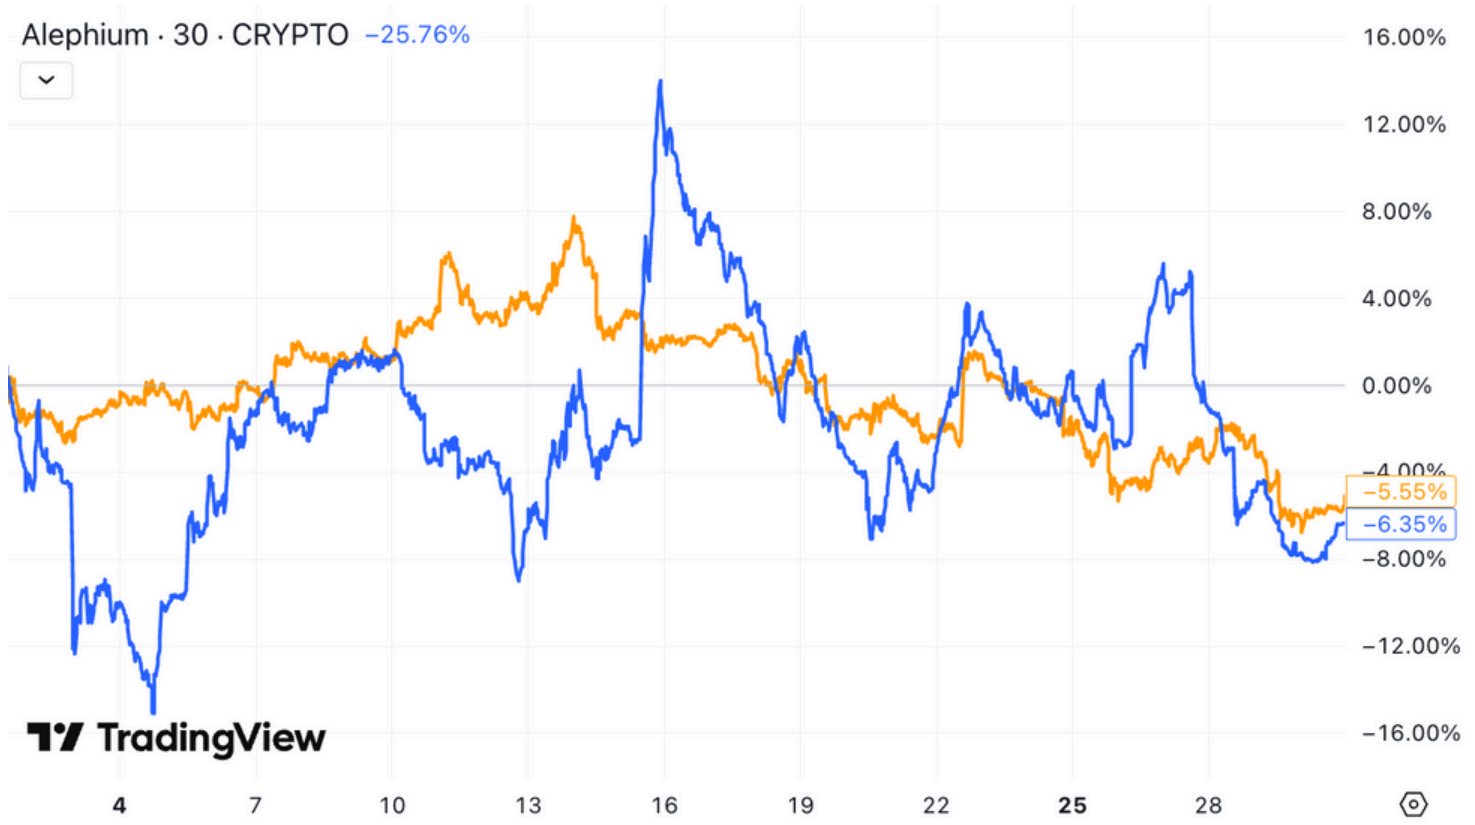

We are assessing the costs of adding more infrastructure to comply with the new limits. We will keep you updated as soon as we have a clear view of how (or if) we can continue operating.

#### **What you should do**

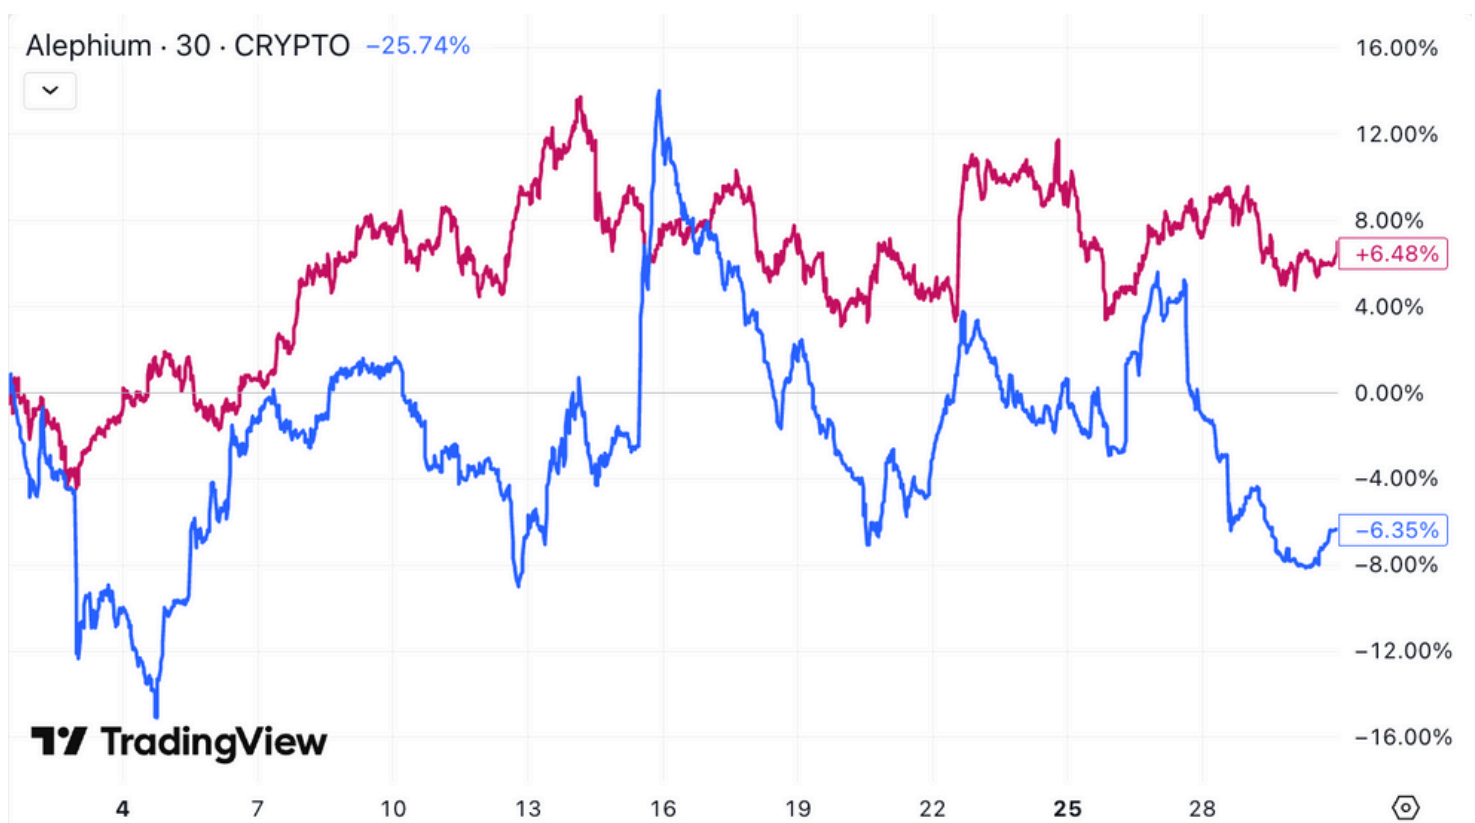

Stay tuned for further updates — we will share more details as soon as possible. We deeply value your trust and patience in this situation. This decision is not ours, and it is not the experience we want for our delegators. Rest assured that we are committed to making this transition as smooth as possible.

## ALEPHIUM METRICS

On the following page, you'll find some charts relating to Alephium. To begin with, here is an evolution of the price of \$ALPH with a comparison to \$BTC, over the month of August.

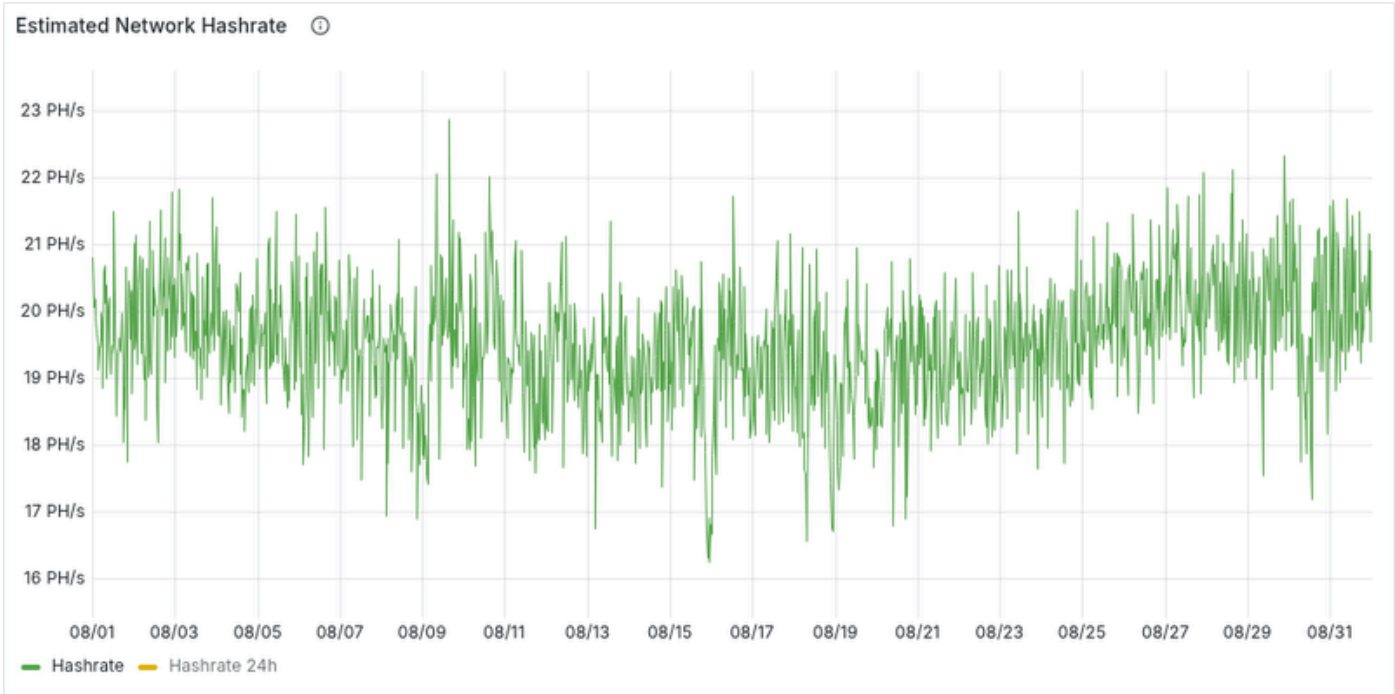

Another comparison between \$ALPH vs TOTAL3 (all altcoins excluding \$BTC and \$ETH)

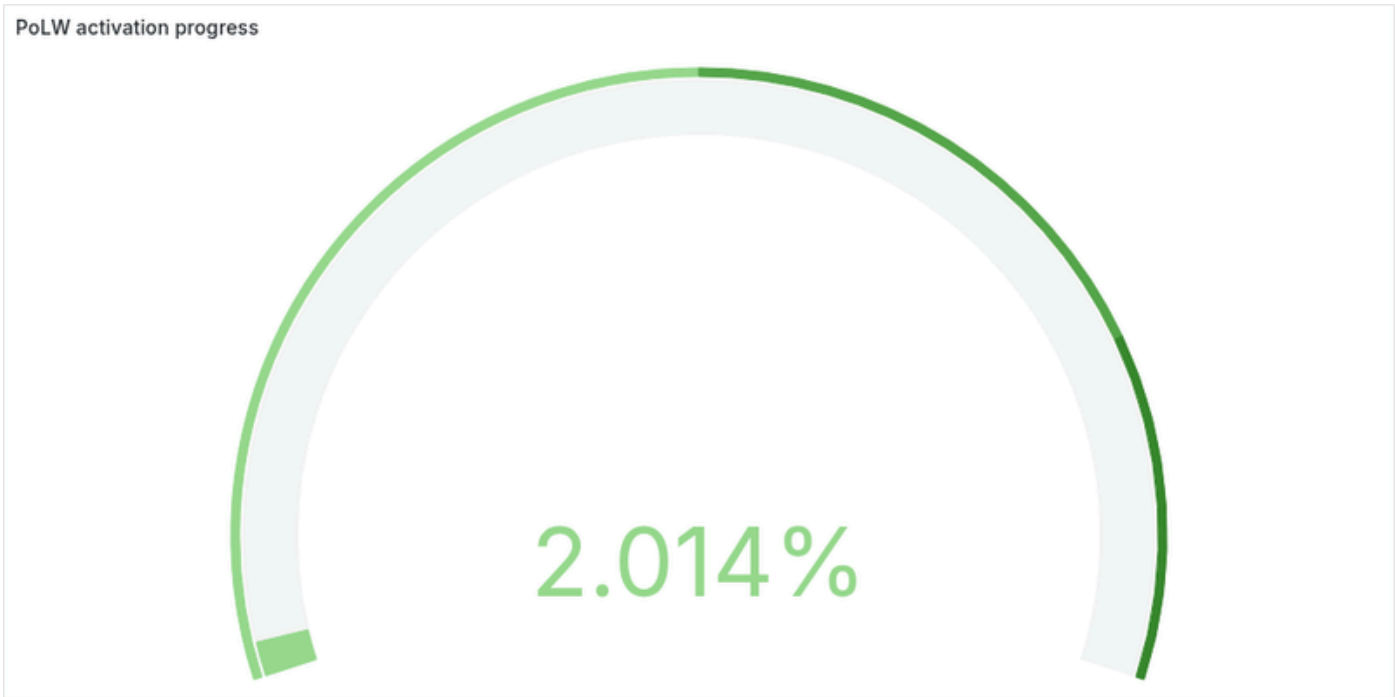

# ALEPHIUM METRICS

This section illustrates the evolution of the hashrate. During the month of August, **the hashrate decreased by 1.66% (20.00 PH/s).**

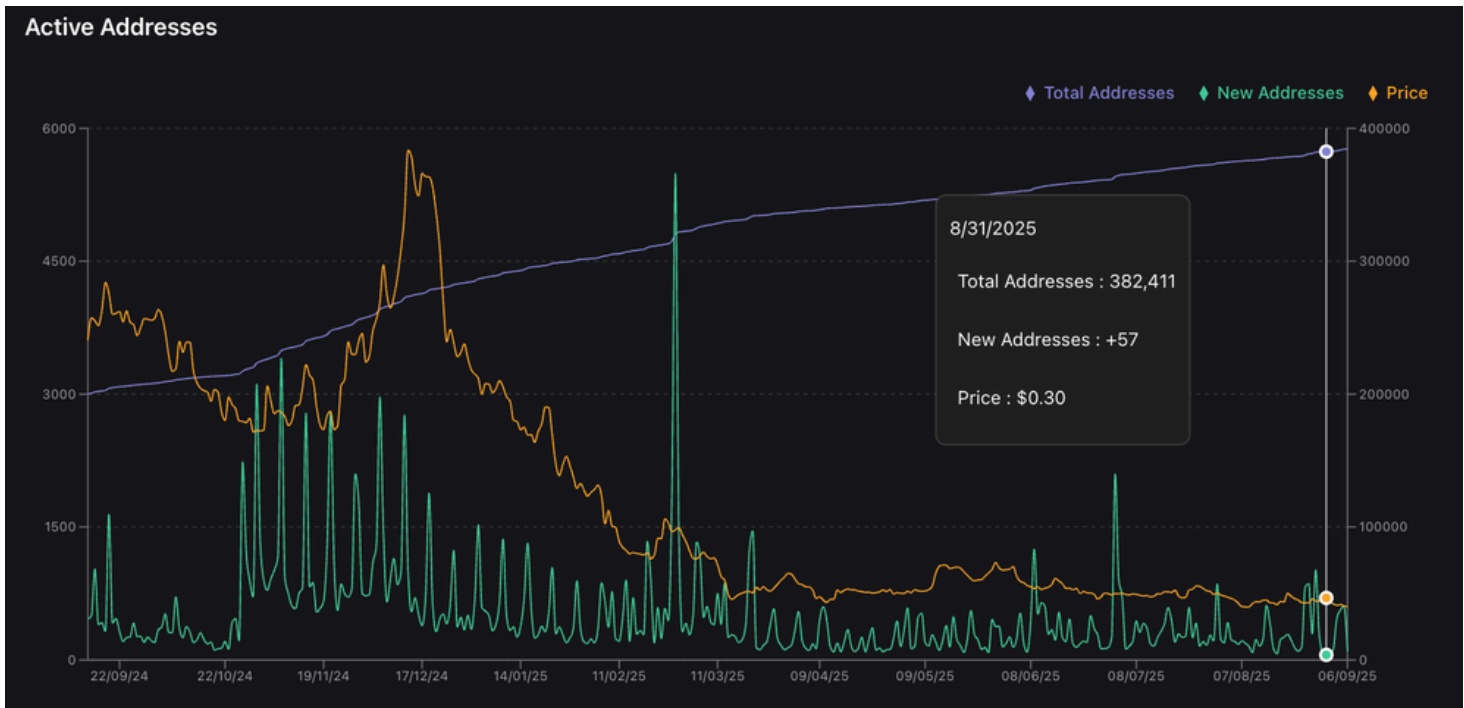

In terms of PoLW activation progression, approximately **3.938k ALPH** were burned in August.

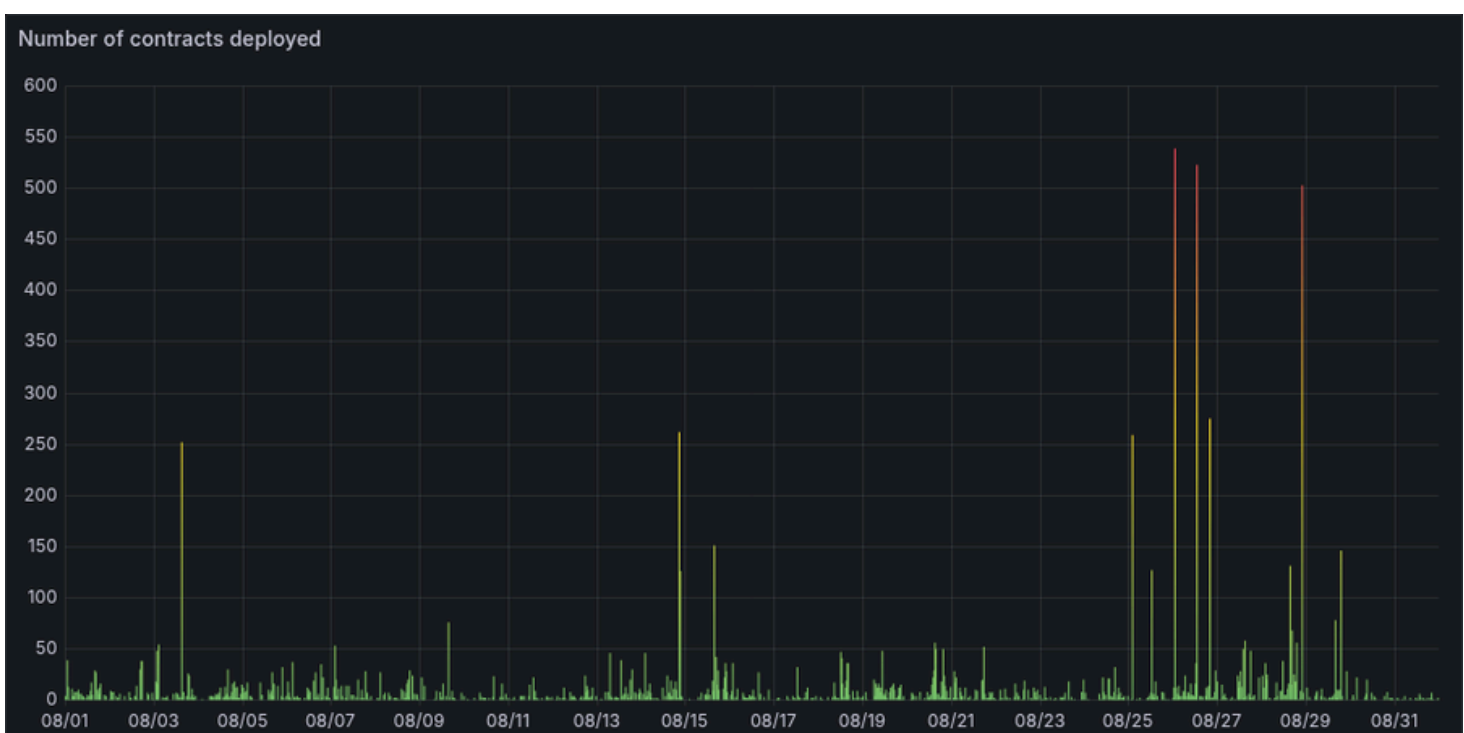

# ALEPHIUM METRICS

Here's the evolution of the total number of active addresses.

Source : <https://richlist.alephium.world/>

Over the month, the network processed approximately **327k transactions** and nearly **9.76k contracts were deployed** and **4.24k destroyed**.

The No Trust Verify team would like to thank you for your trust and remains at your disposal for any further information.
