MONTHLY REPORT #23

APRIL 2024

NOTRUSTVERIFY.CH

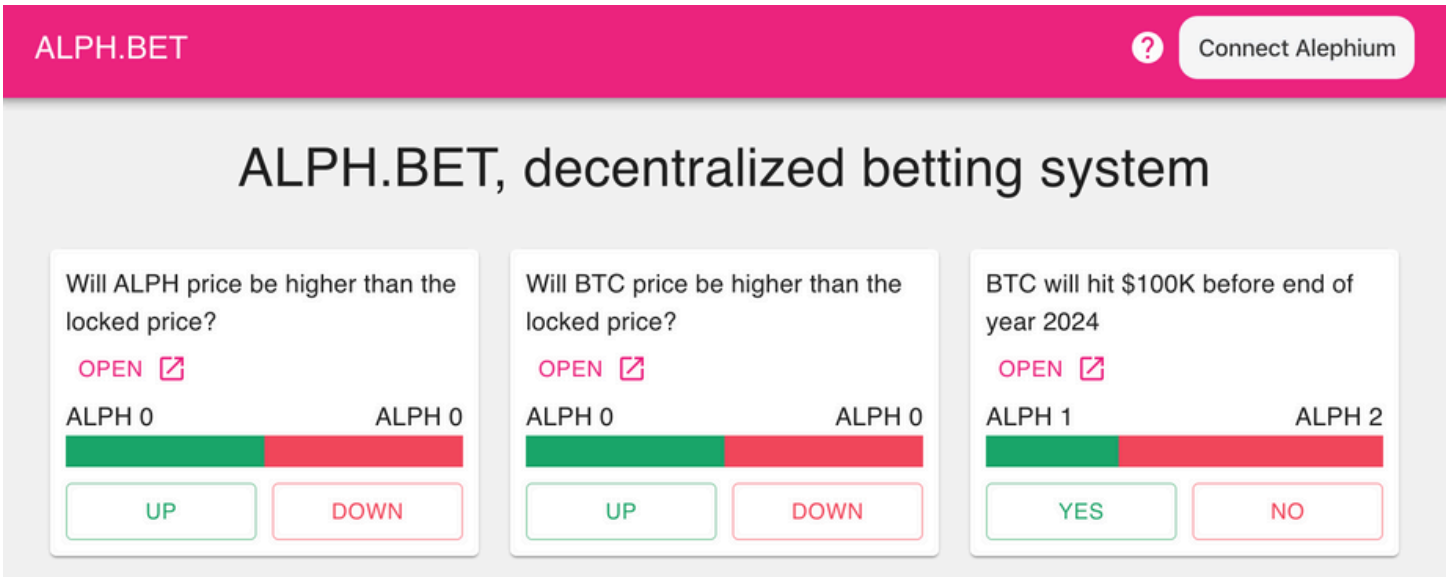
Here is a summary of work done by No Trust Verify since our last report

08 APRIL

We have released a new version of https://alph.bet/!

- New front
- Ability to bet directly on the main page
- Display of betting history

This is a temporary V2 version awaiting V3, which is currently under development. We are committed to delivering the most enjoyable and intuitive user experience possible.



10 APRIL

The Alph.bet front end is now live on the Flux Web3 Cloud!

Test our DApp here: https://alphbet.app.runonflux.io/

Here is a summary of work done by No Trust Verify since our last report

25 APRIL

We've identified an issue with the following smart contracts on Alph.bet

-Which project will have a higher mcap
-Rhone upgrade deployed in Q2 on mainnet
-ALPH in top 100 by market cap on CoinGecko before end of 2024

The affected users have been promptly reimbursed, and the contract has been swiftly corrected to ensure ongoing reliability. We will be deploying new contracts very soon, along with new options.

27 APRIL

A new bet has appeared on Alph.bet: BTC will hit $100K before end of year 2024

30 APRIL

Since over 2 years No Trust Verify supported and participated in Nym project by developing few tools on their mixnet, like pastenym or a dashboard tracking packets mixed by the mixnet along with other stats.

A series of recent updates and unannounced changes operated by Nym had a negative impact on our different projects such as unexpected behavior or service interruption. Along with the lack of vision, we don't have the bandwidth to change everything everyday in an emergency response mode. We have decided to let our tools running until they are no longer working. **Please be careful if you use them : along with their availability we cannot guarantee their reliability anymore.**

This decision and the fact that some tools we've developed on NYM will get deprecated, have no impact on mixnodes we operate. We are committed to provide the community with reliable infrastructure, along with the best service.

NYM METRICS

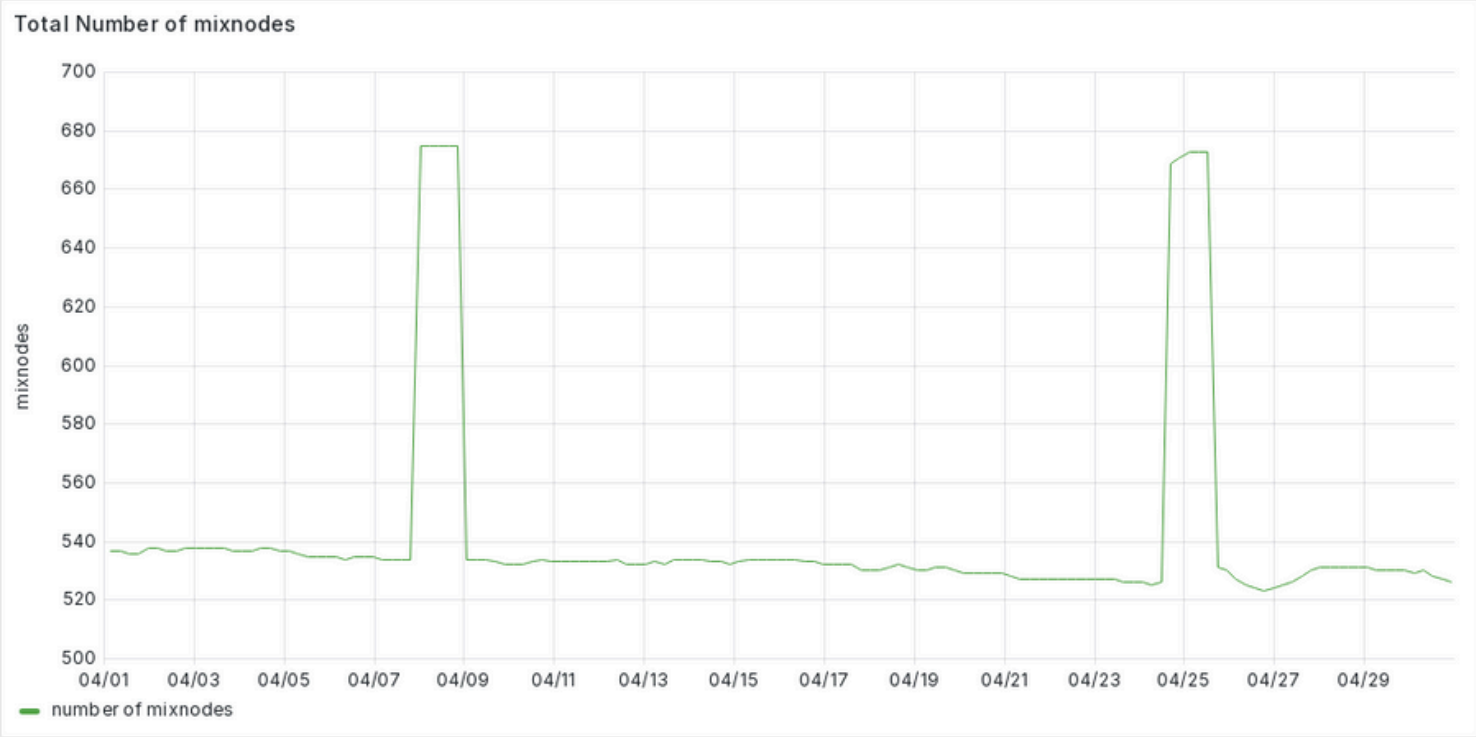
On the following pages, you'll find some of the most important metrics of the NYM network. To begin with, here is an evolution of the price of $NYM with a comparison to $BTC, over the month of April.

NYM is part of the Cosmos ecosystem. We check $NYM performance against $ATOM, the ecosystem native token.

NYM METRICS

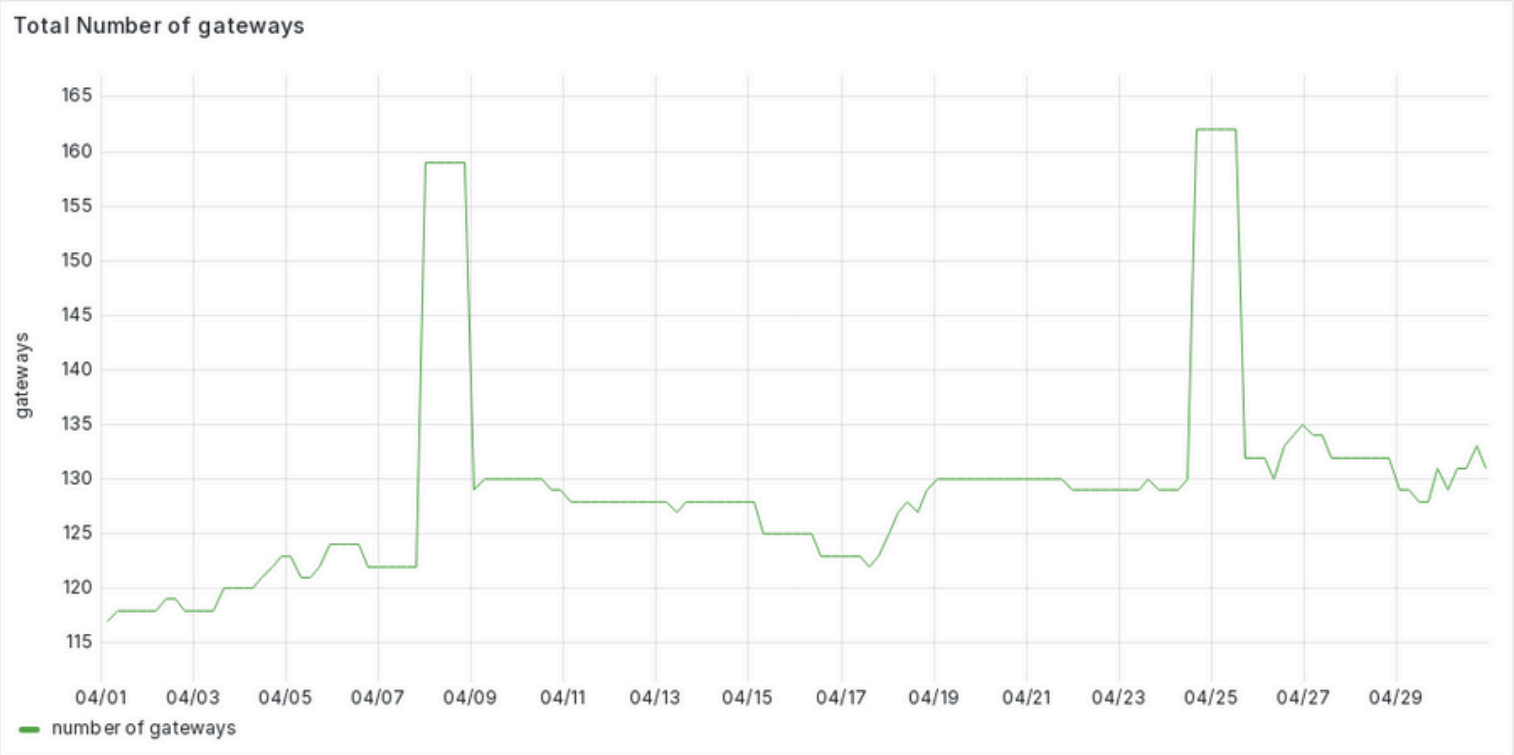
Packet processing trends for the entire mixnet. This month saw a significant increase in the number of packets transmitted, due to the arrival of NymVPN.

The number of mixnodes remained fairly stable. The variations are due to technical incidents caused by changes made by Nym (see announcement of 30 April).

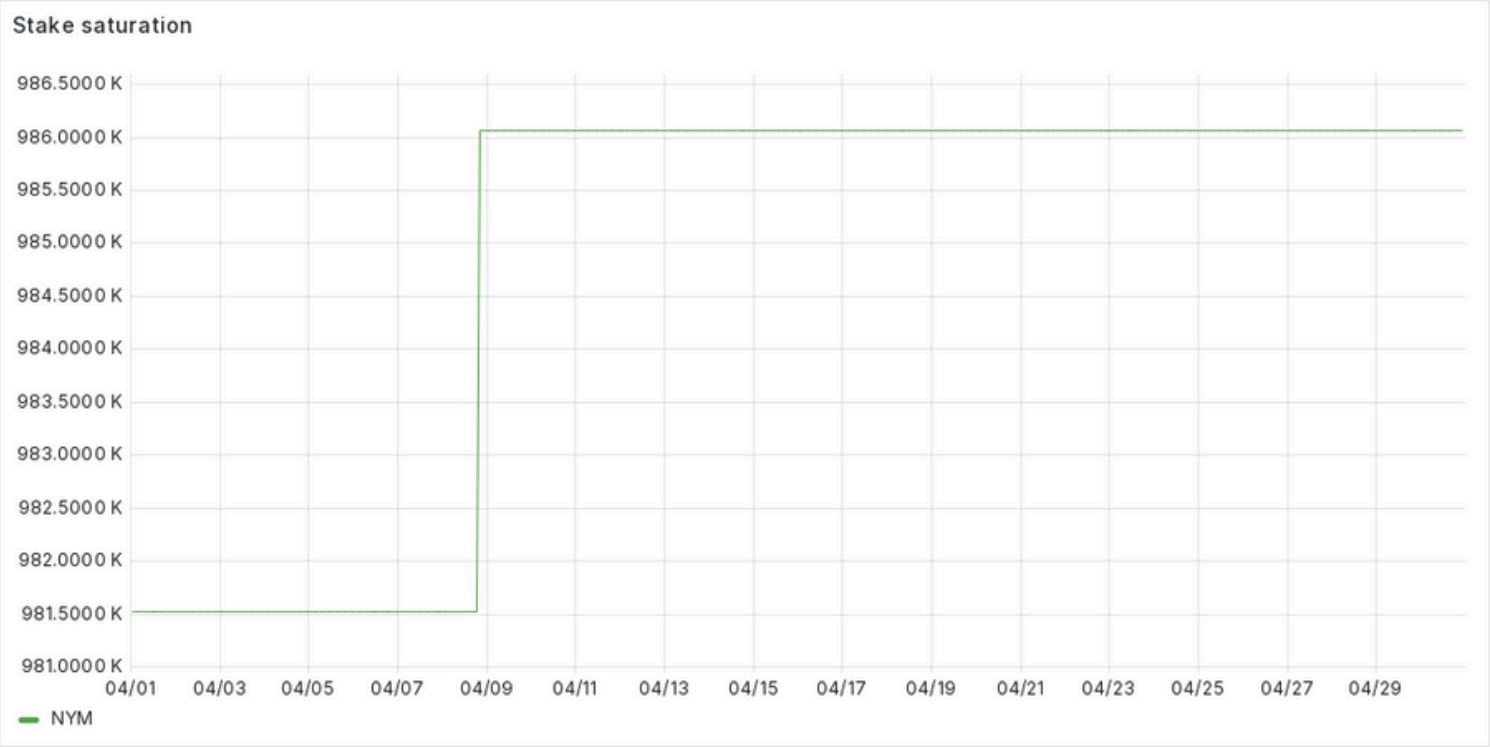


NYM METRICS

This section shows the evolution of the total number of **gateways**.The number of gateways increased during the month.



Stake saturation has increased too.



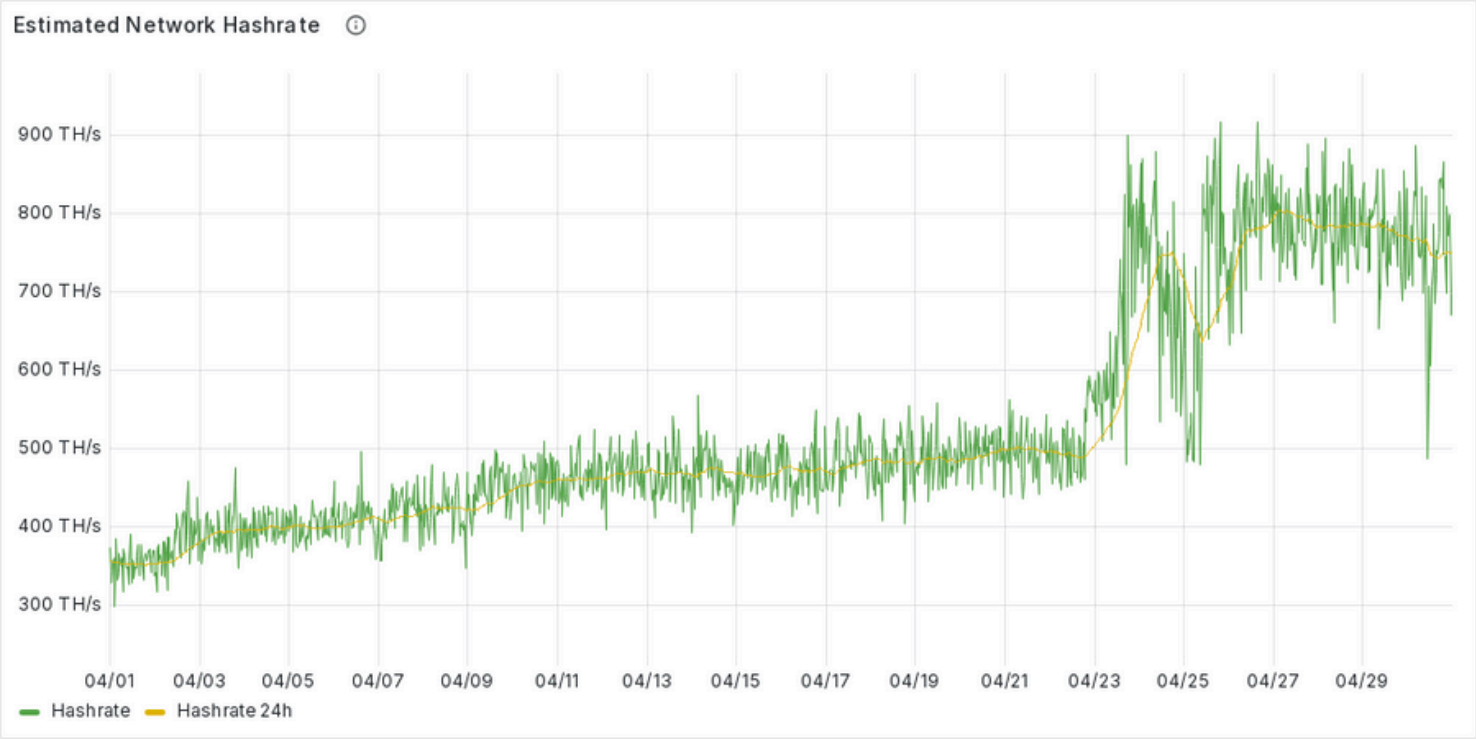
ALEPHIUM METRICS

On the following page, you'll find some charts relating to Alephium. To begin with, here is an evolution of the price of $ALPH with a comparison to $BTC, over the month of April..

Another comparison between $ALPH vs TOTAL3 (all altcoins excluding $BTC and $ETH)

ALEPHIUM METRICS

This section illustrates the progression of the hashrate. The introduction of ASICs has precipitated a substantial surge in the hash rate.



Here's the evolution of the total number of wallets.
