MONTHLY REPORT #26

JULY 2024

01 JULY

Our work inspired LunarDAO's latest article on SimpleX! This is a revolutionary messaging app featuring account-free communication, self-destructing messages, and voice & video calls.

Find it here: https://wiki.lunardao.net/simplexchat.html

08 JULY

Alongside Maud Bannwart, COO of Alephium, we participated in a French AMA hosted by the content creator Monsieur-TK. We had the opportunity to discuss Alephium, its technology, ecosystem, and future prospects with other builders.

09 JULY

We've created an in-depth thread about reentrancy attacks and Alephium. reentrancy attacks are notorious in the blockchain world, especially on Ethereum. These attacks exploit vulnerabilities in smart contracts, allowing attackers to drain funds maliciously. In our latest thread, we explore the mechanics of these attacks and how Alephium effectively mitigates them.

18 JULY

We are excited to announce that the Indexer for AlephiumANS is now live! This new tool provides seamless access to Alephium Address Name Service data. You can use our API at http://api.ans.notrustverify.ch to integrate AlephiumANS into your applications.

For detailed instructions and more information, visit our documentation at https://api.ans.notrustverify.ch/docs/index.html.

24 JULY

In order to consolidate our activities and focus on what we do best : infrastructure-related projects, No Trust Verify decided to discontinue our proof of concept dapp ALPH.bet

Thank you for your incredible support ! With this Proof of Concept, we've learned a lot and shared on our journey in following posts :

- Part 1
- Part 2
- Part 3

Despite the fact that ALPH.bet frontend will no longer be available online, you can still access the contracts and frontend code using following links :

- Contracts Repository
- Frontend Repository

# ALEPHIUM METRICS

On the following page, you'll find some charts relating to Alephium. To begin with, here is an evolution of the price of $ALPH with a comparison to $BTC, over the month of July.

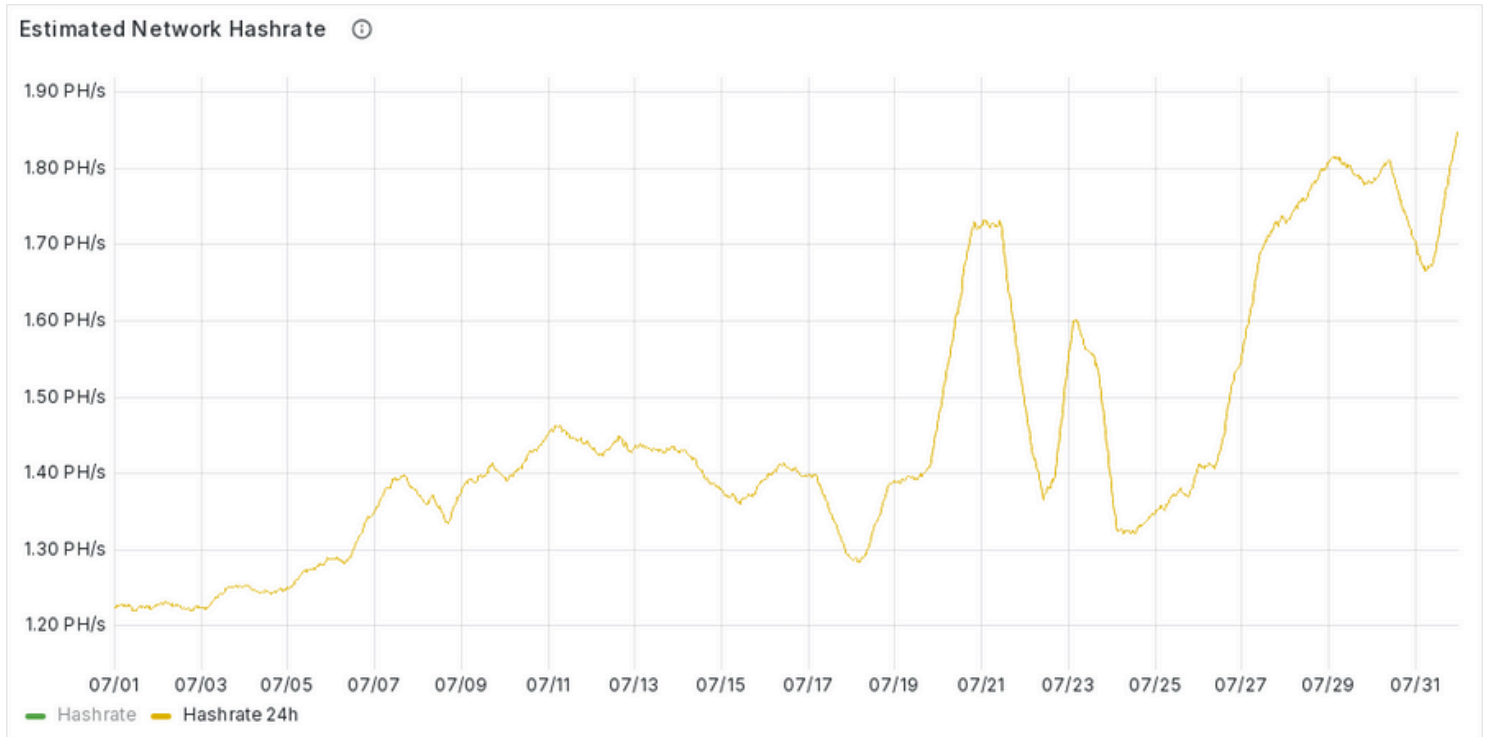

Another comparison between $ALPH vs TOTAL3
(all altcoins excluding $BTC and $ETH)

This section illustrates the evolution of the hashrate. As you can see, this evolution continues with the arrival of ASICs on Alephium.

Here's the evolution of the total number of wallets.
